Cautions	<ul style="list-style-type: none"> Take care not to let personal preferences become prescriptions. Judgments must be supported by clear, external criteria. Stay learning-focused and don't let personal passion overtake patience with the developmental process. Be aware that overuse of the consulting stance may build dependency on the supervisor for problem solving. 	<ul style="list-style-type: none"> Resist the impulse to dominate the conversation and provide the bulk of the analysis and thinking. Monitor for balance in idea production. Don't allow personal enthusiasm or preferences to override the intention to co-create ideas and options. 	<ul style="list-style-type: none"> Reduce potential frustration by posing developmentally appropriate questions. Questions should stretch not strain thinking. Be sure that questions allow for multiple responses and do not signal that there is a preferred answer.
